

CATALOGUE 2019/2020

Thermal Control Made Simple

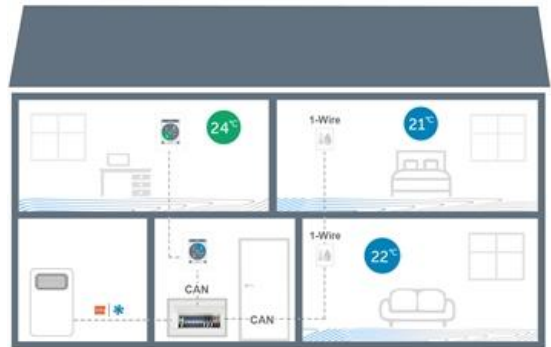

Dear SOREL Customer

the technical trends of the year will be shaped by the interplay of increasing connectivity, extensive use of sensors, and software intelligence. This is often referred to as the Internet of Things and opens up fascinating possibilities for all kinds of HVAC applications. The SOREL team is strongly committed to making these technologies accessible for the digital enhancement of your heating systems. At the same time, it is important to have both feet on the ground to preserve well-established solutions from unnecessary overload. Our motto "Temperature Control Made Simple" continues to guide us well here.

Besides the range of well-proven temperature controls, we recommend a closer look at the following new highlights in this catalogue:

- elegant °CALEON Smart Thermostats with Internet connection and matching °CALEON app on page 17.
- the °CALEONbox series on page 13 with suitable °CALEON Room Controllers for convenient **multi-zone control of underfloor heating and cooling**. Optionally with WiFi and smartphone app.
- for combined temperature control of heating and domestic hot water for **heat interface units**, you will find the new °CALEONbox Fresh on page 14.
- new **smart grid** function in the HCC controllers for efficient use of electricity surpluses
- optimised control behaviour in case of strong hot water load changes in the FWC series, as well as optional **LIN bus** interface.

We would be pleased if there is something suitable for you. If not, we would be happy to have a chat with you on a tailor-made OEM development. In any case, we look forward to hearing from you and are at your side with advice and assistance!

Jonas Bicher and Georg Bicher, CEOs

LHCC - Additional functions for free relays

- Thermostat
- Return flow increase
- Transfer
- Difference
- Solid fuel boilers
- Free Cooling
- Dehumidifier
- Error message
- Pressure monitoring
- Parallel operating with R1
- Parallel operating with R2
- Always on
- Heat circuit 1/2
- Solar
- Burner
- Compressor
- Boiler pump
- Remote
- HP Compressor
- DHW Valve
- Cooling Valve
- circulation
- Heating rod
- RLA Mixer
- Dissipation
- Season Switch

Example:

System 1 +

Combined storage with heating circuit with additional functions glycol pump and compressor.

System 2 +

Combined storage with mixed heating circuit with additional functions solar and heat exchangers.

System 8 +

Combined storage or buffer storage with mixed heating circuit with additional function burner and boiler pump.

XHCC - XtraLarge Heating Circuit Controller

Weather-compensated heating controller for complex systems with up to two mixed heating and cooling circuits, different heat sources and free assignable functions for unused relays.

System 1 +  + 

Combined storage tank with mixed heating circuit with additional function solar and additional heating with pump.

System 2 +  + 

Combined storage tank with mixed heating circuit with additional function, additional heating and heat pump / compressor with brine pump.

System 8 + 

Combined storage tank with buffer storage tank with mixed heat circuit with additional function 2nd heating circuit.

MHCC as an extension Module for 1 Mixed Heating Circuit each

XHCC standard system: Combined storage with solar, gas boiler and heating circuit. An MHCC with °CALEON adds another heating circuit.

XHCC standard system: Buffer and hot water storage with solar, gas boiler and heating circuit. An MHCC adds another heating circuit.

XHCC standard system: Buffer and hot water storage with solar, heat pump and heating circuit. Two MHCCs with °CALEON add two heating circuits.

LHCC with °CALEON Clima as an extension for 1 Heating and Cooling Circuit

XHCC standard system: Buffer and hot water storage with solar, heat pump and heating and cooling circuit extended by 2 LHCC and 2 °CALEON Clima for an additional heating and cooling circuit.

XHCC standard system: Buffer and hot water storage with solar, heat pump and heating and cooling circuit extended by 1 LHCCs and 1 °CALEON Climas for two additional heating and cooling circuits.

Heating circuit group

Heating circuit group MHCC

Heating circuit group MHCC

Completely preassembled and tested 2-Way pump group with 3-way-mixer, Servomotor and weather compensated Heating Controller MHCC incl. sensors

- Size: 466 x 250 x 215 mm
- PN10, max. Temp. 110 °C, KVS 6,0
- Flow right, return left
- 2 ball valves with integrated thermometer
- external connector 1" Female
- Speed controlled High efficiency pump
- Wilo Stratos Pico 25/1-6
- 3-way-mixing valve with KVS 10,0
- Servomotor with 90° operating range
- Heat Circuit Controller MHCC
- completely prewired with connection box
- Outdoor sensor TA55, flow sensor TR/S1.5

Universal system and multi-zone controller for surface heating systems and heat interface units. Particularly time-saving installation and flexibly expandable with optional additional functions for free outputs.

Controls up to 8 zones with 1-4 actuators each in 24V or 230V version

For each zone, either °CALEON Room Controller or 1-wire sensor can be connected

Comfortable system configuration via touch and full text via °CALEON Room Controller. At the same time offers a high-quality room thermostat for the end user

Easy maintenance with software updates via WiFi and elegant smartphone app for end users with °CALEON Smart Room Controller

Built-in setup wizard to facilitate fast and correct commissioning

Preventive dew point calculation based on relative humidity in the rooms

Additional functions can be selected for free outputs: weather-compensated mixing circuit, auxiliary heating, switching heating/cooling, dehumidifier, etc. (depending on model)

Modular system for connecting several °CALEONboxes with each other or with further SOREL controllers. For example, outdoor temperature and heating or cooling requirements are exchanged

Easy installation

Press-on clamp terminals instead of screw clamps for easy wiring

Removable dividers and front cover for more space during clamp connection

Intuitive wiring thanks to colour-coded clamp terminals

Easy installation also on DIN rail

Innovative press-in strain relief for flexible wires

Art. No. 74003 - °CALEONbox Fresh

from quantity	1	5	10	20
---------------	---	---	----	----

Note: Sales only to manufacturers of fresh water systems.

We'll happily contribute with our 10+ years experience in developing fresh water systems, and support you in the initial adjustment of all control parameters to your stations - for quick and precise tapping temperatures in every common tapping situations.

°CALEONboxes and °CALEON Room Controllers can be combined as desired. Some possibilities:

Zone control in a single-family house with heat request:

- 1x °CALEONbox
- 1x °CALEON Room Controller
- 1x Room Sensor 1-Wire per additional room

Zone control in a single-family house with several °CALEON, WiFi and heat request:

- 1x °CALEONbox
- 1x °CALEON Smart Room Controller (WiFi)
- 1x °CALEON Room Controller per additional room

Single-family house with energy request and season switch heating/cooling:

- 1x °CALEONbox Clima
- 2x °CALEON Clima Room Controller
- 1x Room Sensor 1-Wire per additional room

Heating and cooling in a single-family house with WiFi room sensors:

- 1x °CALEONbox Clima
- 1x °CALEON Clima Smart Room Controller (WiFi)
- 1x Room Sensor Clima Smart per additional room (WiFi)

Heating and cooling in offices/hotels/commercial buildings:

- 1x °CALEONbox per 8 rooms
- 1x Room Sensor 1-Wire per room
- 1x °CALEON Clima Room Controller

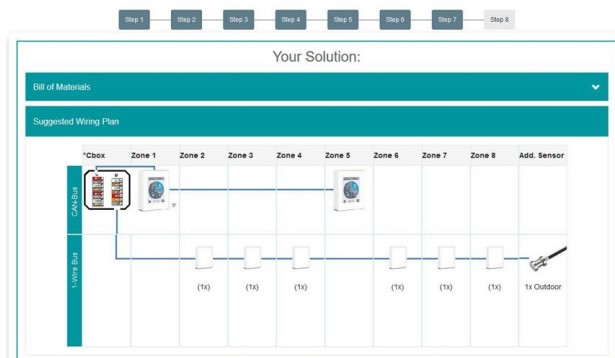

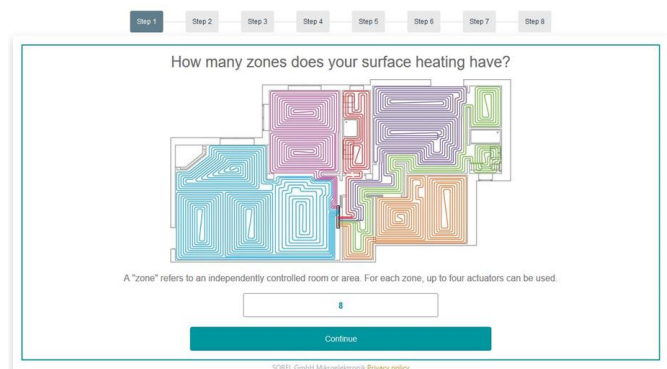

Multi-family house with decentral fresh water control:

- 1x °CALEONbox Fresh per apartment
- 1x °CALEON Room Controller per apartment
- 1x Room Sensor 1-Wire per additional room

°CALEONbox Configurator

Find the right components for controlling your underfloor heating and cooling system with the °CALEONbox in 7 steps.

Start Configurator:

<https://caleonbox.sorel.de>

Room Sensors for °CALEONbox

Each zone of the °CALEONbox requires either a °CALEON or room sensors to enable zoning control. The flush-mount variant of the room sensor is compatible with all square 55 mm switch frame systems from common manufacturers such as Gira, Busch-Jaeger, Jung, Berker and Merten.

°CALEON Room Controller

With capacitive TFT touch display for comfortable remote control of the heating and cooling system from the living room. °CALEON Room Controllers influence the calculation of the flow temperature in the matching HCC controller or °CALEONbox, thus permitting an even faster and more precise temperature control.

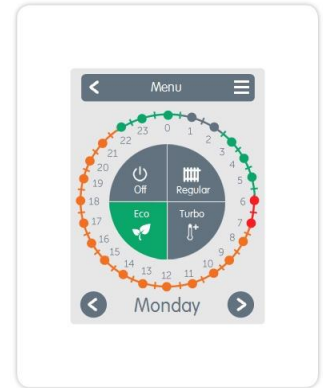

Room selection with several heating zones

Season switch heating/cooling (Clima)

Adjust operating modes and feel-good temperature

Intuitive time switch for weekly program

Application Examples

Zone control in single-family house with several °CALEON, WiFi and heat request:

- 1x °CALEONbox
- 1x °CALEON Smart Room Controller (WiFi)
- 1x °CALEON Room Controller per room

Zone control in a single-family house with energy request and season switch heating/cooling:

- 1x °CALEONbox Clima
- 2x °CALEON Clima Room Controller
- 1x Room Sensor 1-Wire per room

Weather-compensated heating circuit with room influence:

- 1x MHCC
- 1x °CALEON Smart Room Controller (WiFi)

Weather-compensated heating circuit for heating and cooling:

- 1x LHCC
- 1x °CALEON Smart Room Controller (WiFi)

Prices ex works, excl. sales tax. Terms and conditions as can be seen on sorel.de shall apply. Discount on request.

°CALEON Room Controllers

Room Controllers for remote control and optimisation of the heating system in combination with SOREL heating controllers or °CALEONbox. By influencing the calculation of the flow temperature, they permit an even faster and more precise temperature control.

°CALEON Room Controller

Elegant room controller with capacitive TFT touch panel for comfortable remote control and optimisation of the heating system in combination with MHCC, LHCC, XHCC or °CALEONbox.

Pump groups without TDC controller

S1-Solar-1

Completely pre-assembled and tested pump groups 3/4" with solar pump and safety assembly

- High-efficiency pump WILO Yonos Para ST 25/6 iPWM
- Ball valves with integrated stop valve and thermometer
- Flow meter 2-12 l/min with stop valve and 2 fill and drain ball valves
- Safety assembly with manometer 0-10 bar and safety valve 6 bar
- Outlet 3/4" to expansion tank at the safety assembly
- Wall-fastening fixture
- Working temperature 120 °C (short-term 160 °C)

Art. No. 71111 - S1-Solar-1 3/4"AG

Art. No. 71111

S2-Solar-2

Completely pre-assembled and tested pump groups 3/4" with solar pump and safety assembly

- High-efficiency pump WILO Yonos Para ST 25/6 iPWM
- Ball valves with integrated stop valve and thermometer
- Flow meter 2-12 l/min with stop valve and 2 fill and drain ball valves
- Safety assembly with manometer 0-10 bar and safety valve 6 bar
- Outlet 3/4" to expansion tank at the safety assembly
- Wall-fastening fixture
- Distance between supply and return 125 mm
- Working temperature 120 °C (short-term 160)

Pump groups of different manufacturers and previous versions with standard pumps are available on request.

DrainSet MTDC and DrainSet LTDC Completely pre-assembled, pre-wired and pre-configured drain-back station for self-draining solar systems. Consisting of the following components:

- Drain-Back Box with a volume up to 40l (depending on collector size 30-40m²)
- TDC controller incl. 3 Temperature sensors
- Safety valve 6 bar with pressure gauge
- Filling and flushing unit DN20 incl. connections and fill and drain valve
- Modular extension for big systems possible
- High efficiency solar pump (WILO Yonos Para ST 25 /13 PWM, height up to 13m)
- The height indications refer to water as the heat transfer medium. If glycol is used to fill the drain-back system, the delivery head of the pump is reduced by about 2-3 meters.

Art. No. 67165 - DrainSet MTDC

from quantity	1	4	8	16

Operating Principle of Drain-back systems

Idle mode of solar system

In idle mode, the heat transfer medium is in the Drain-Back Box. The collectors are empty.

Solar system in operation

Under solar exposure, the system is set into operation by the TDC controller and the whole solar circuit / collectors are filled with maximum pump speed. Once in regular operation, the pump operates with reduced and continuously optimized speed to save energy.

Storage fully loaded

When the storage is fully heated up or if the solar collectors are no longer warmer than the storage, the pump is automatically switched off. The heat transfer medium flows back from the collectors into the Drain-Box system without vaporizing. Therefore, any overheating of stagnant solar systems is effectively prevented.

Pool TDC M / M+ Pool Controllers

Solar pool controller with optional control of the filter pump for efficient use and function control of the solar or heating system of your pool.

SOREL Connect - Monitoring and Analysis

SOREL Connect Controllers and °CALEON Room Controllers enable convenient system monitoring and data logging.

SOREL Connect is the Plug & Play concept which does not require any particular network skills. Using a CAN-bus interface, the controllers can communicate with each other, or be connected with local networks or the Internet via Ethernet. The user can monitor the system at any time and from any location via PC, tablet and smartphone.

Key features (depending on version): visualisation of the heating system with status messages, Temperatures and heat yield statistics. Influence the room Temperature, activation of comfort boost (HCCs). Data logging is realised by a microSD card, so that all system data can be recorded and analysed extensively.

System overview

Energy statistics

Temperature curves (only HCC)

Technical details for the expert

Network Principle

Application example: XHCC with direct Ethernet connection

Application example: MHCC with Ethernet connection via data logger

Application example: additional mixed heating circuit and 2 °CALEON Room Controllers

Application example: fresh water cascade

Data logger

For use with MTDC, LTDC, MHCC, LHCC, XHCC, MFWC and LFWC. The set consists of data logger, Micro SD-card, Ethernet interface, wall power supply, 1m CAN connection cable to the controller, licence for SOREL Connect.

Actuators

ARA661 actuators are used in combination with a heating mixer and are controlled by a 230V 3-point signal from the heating controller to adjust the desired flow Temperature. Compatible controllers: HCC series, LFWC, SLC

Run time at 90° position	2 minutes
Torque	6 Nm
Operating voltage	230VAC 50 Hz
power consumption	5VA
valid temp.of environment	5°C bis 55°C

Actuator ARA661

Art. No. 76901

The new PWM actuators ARA598 are used in combination with a heating mixer and are controlled by a PWM signal from the heating controller to adjust the desired flow Temperature particularly fast and precisely. As a result of the PWM control, 2 relay outputs are set free for additional functions. Compatible controllers: LHCC, XHCC, LFWC, SLC, °CALEONbox and °CALEONbox Clima.

Actuator ARA598 PWM 12-24VDC 5W

Art. No. 76900

Temperature sensors

Temperature sensors with PT1000 sensor elements - with guaranteed degree-accuracy according to DIN EN60751 (IEC751) - ensure precise recognition of the temperature difference and optimum use of energy.

Room Sensors 1-Wire for °CALEONbox

Each zone of the °CALEONbox requires either a °CALEON or room sensors to enable zoning control. The flush-mount variant of the room sensor is compatible with all square 55 mm switch frame systems from common manufacturers such as Gira, Busch-Jaeger, Jung, Berker and Merten.

Room Sensor 1-Wire (55 mm UP / in-wall)

Digital room temperature sensor with communication via 1-wire bus in combination with °CALEONbox.

Power supply	3,3 VDC ... 5 VDC SELV or PELV
Measurement range	0 °C ... 60 °C accuracy: +/- 1 °C resolution: 0,1 °C
Protection Class	IP20
Max. cable length	Up to 100 m powered (three-wire connection recommended), up to 50 m parasitic (two-wire connection), using twisted pair cables
Dimensions/ Housing	80 mm x 80 mm/ white plastic housing pure white
Installation methods	Flush-mounted switch box

Art. No. 80003 -Room Sensor 1-Wire (55 mm UP / in-wall)

from quantity	1	10	20	40
---------------	---	----	----	----

Room Sensor Clima 1-Wire (55 mm UP / in-wall)

Digital room temperature and humidity sensor with communication via 1-wire bus in combination with °CALEONbox.

Power supply	3,3 VDC ... 5 VDC SELV or PELV
measurement range	0 °C ... 60 °C / 0% ... 100% accuracy: +/- 1 °C / +/- 6 % resolution: 0,1 °C / 0,1 %
Protection Class	IP20
Max. cable length	up to 100 m powered (three-wire connection recommended), use twisted pair cable

Direct Sensors

VFS sensor for combined flow and temperature measurement

- no moving parts in the fluid
- minimal permanent pressure loss
- no increasing measurement deviation due to wear-out
- „2 in 1 Sensor“ - flow and Temperature in one sensor

Available in 1,2-12 l/min, 2-40 l/min, 5-100 l/min, 10-200 l/min, 20-400 l/min in stainless steel tube

VFS 1-12L/Min 0-100°C, 3/4" AG, stainless steel

Art. No. 78012

VFS 2-40L/Min 0-100°C, 3/4" AG, stainless steel

Art. No. 78040

VFS 5-100L/Min 0-100°C, 1", stainless steel

Art. No. 78100

VFS 10-200L/Min 0-100°C, 1 1/4" stainless steel

Art. No. 78200

VFS 20-400L/Min 0-100°C, 1 1/2" plastic

Art. No. 78400

VVX15 combined sensor for flow and temperature measurement

- for details see VFS combined sensor
- especially robust, sensor element separated from medium

VVX15 2-40L/Min 0-100°C, 3/4" AG, plastic

Art. No. 78041

RPS - sensor for combined pressure and Temperature measurement

- no moving parts in the fluid
- precise pressure sensor, Temperature compensated and linearized
- „2 in 1 sensor“ - pressure and Temperature in one sensor

RPS -sensor 0-10 bar 2,9m cable

Art. No. 78600

Relays

External relay 1W 10A in protective casing, to be used where e.g. outputs of the controller shall be operated potential-free, the control power of the controller is not sufficient.

coil voltage	9-230V AC/DC
max. switching voltage	250VAC
switching contacts	1 change over contact
max. switching current	10A at AC1
case protection category	IP55

Relay IFR/ 1W

Art. No. 77500

External switching relay 4 NO 24A in the protective housing is to be used wherever the switching capacity of the controller is not sufficient when multi-pole switching is required, as for example with three-phase electric heating rods.

coil voltage	230VAC
max. switching voltage	400VAC
switching contacts	4 closing contact
max. switching current	24A for AC1
case protection category	IP30

Relays 4S x 24A

Art. No. 77501

External relay 1W 6A in protective casing, to be used where the 0-10V outputs of the controller shall be operated potential-free

coil voltage	9-12VDC
max. switching voltage	250VAC
switching contacts	1 change over contact
max. switching current	6A bei AC1
case protection category	IP55

Relay 1W 6A

Art. No. 77502

Other accessories

Overvoltage protection for collector sensor in 90 x 35 x 38 mm conduit box

Art. No. 77600-KA12 Overvoltage protection for collector sensor in branch box

from quantity	1	20	50	100
---------------	---	----	----	-----

100 pieces fuse 2A isolated, slow blow, boxed

Art. No. 02125 - 100x fuse 2A slow blow

€/per piece

IP44 Seal Set

Art. No. 06442 - IP44 Seal Set

€/per piece

Switching power supply 24VDC 12W

- 100 - 240VAC
- 24VDC 0,63A
- E.g. suitable as a power supply for up to 6 °CALEON room controllers or for other external devices.
- including wall-mounted housing

Art. No. 77505 - Switching power supply 24VDC 12W

€/per piece

Special net prices, no discounts

Customization S-Controller

STDC front label, plastic, up to 4 colours

€/per piece	
Minimum order quantity	1.000 front labels

Company logo in display at startup

One off cost

Customization M-, L and X-Controller

Company logo in display at startup

One off cost

Text | Logo

TDC/HCC.. front label, paper paper-strip in a transparent plastic window

€/per piece	
One off cost	

Text | Logo

TDC/HCC front label, plastic, up to 4 colours

€/per piece	
Minimum order quantity	500 front labels

Company logo in display at startup and before standby

One off cost

Cardboard sleeve and manual for °CALEON

€/per piece

Minimum order quantity

500

Customized app

Customization °CALEON app

customize color, font, icons and functions.

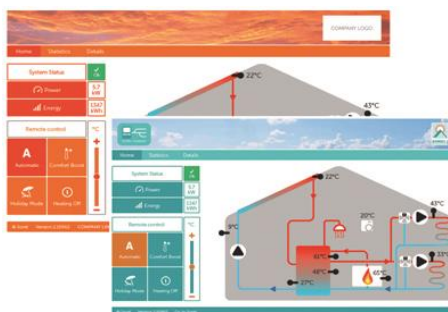

on request

Customized app with custom functionality

on request

Customized SOREL Connect Page

Art. No. Art. no. 77770 SOREL Connect Page - Adaption of header [graphics, logo], sidebar [colour, text] and footer [text, link and colour]

One off cost

Customized packaging

Customized barcode and type decals
(Dimensions 70 x 22 mm)

--	--

Additional manual (e.g. other languages)

€/per piece

--

Parcel stickers / packaging bags
(Dimensions: 70 mm x 25.4 mm, b/w)

€/per piece

--

Sensors in labeled plastic bags

€/per piece

--

Customized manual
(Logo, name, address, contact information)

--	--

Adaptions

For special requirements, we happily extend our controls by the desired hardware or software features. On request, we supply your controls with customer-specific pre-parametrisation as a plug & play solution to simplify the installation – for individual systems as well as in series.

Please contact us: oem@sorel.de

Development Service

You want to implement your own product idea and are looking for a professional partner who turns fiction into reality with you? With more than 25 years of practical experience in electronics and software development for the heating industry, we take your products to the digital age!

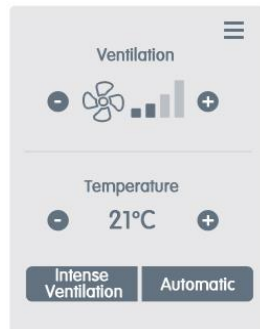

Please contact us: oem@sorel.de

OEM Touchpanel

Based on our classy control panel with capacitive TFT touch display and elegant glass cover, we are pleased to develop an individual product for your application together. Using the existing hardware, operating system and various software modules is the smartest way towards your specific solution with reasonable development effort.

Application Examples

Ventilation Control (2.8")

Wood-Burning Stove Control (2.8")

Universal Timer (2.8")

Smart Thermostat (2.8")

Heat Pump Control (3.5")

Energy Manager (3.5")

Smart Home Central Unit (3.5")

System Controller for Boiler Panels (4.3")

Hardware Options

WLAN

0-10V/PWM

CAN bus

1-Wire

Potential-free

Please contact us: oem@sorel.de

Pre-wiring

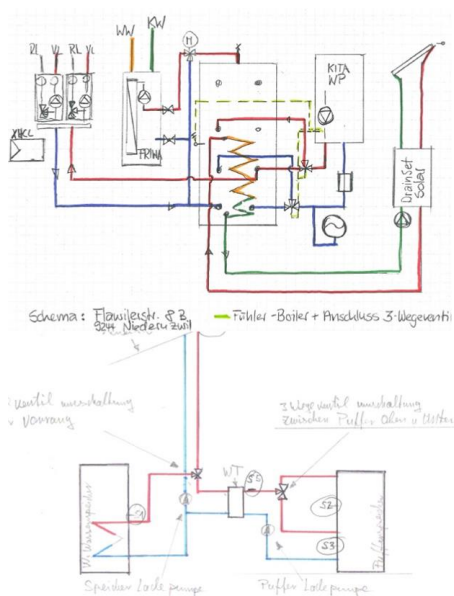

Pre-wiring ex works strongly simplifies the installation on site. It saves time during assembly, prevents mistakes and provides a cost advantage due to the industrial wiring in large quantities. We happily arrange the right solution for your application from our broad selection of ready-for-use cable types and lengths.

Please contact us: oem@sorel.de

System-Dependent Pre-Parametrlation

1. Send hydraulic plan with short description

2. Receive preset controller with clamp connection plan

Manual presetting of the controller adapted to the system of the customer. The price includes a simple sheet with allocation of the appliances like pumps and valves and the Temperature sensors.

Art. No. 06899

PC-Simulation

Handy tool for marketing, training and self-study. Available for every SOREL controller. Request now at simu@sorel.de.

Substitutes for controllers of previous series

This table indicates which new controller succeeds those of previous series. These recommendations are non-binding and do not replace your own examination if the controller meets your requirements.

Previous model	Recommended Controller
TDC 1	MTDC
TDC 2	MTDC
TDC 3	MTDC
TDC 4 without VFS	MTDC/LTDC
TDC 4 with VFS	LTDC
TDC 5	LTDC
SD 01	STDC
SD 01/f	SBMC
DR 01	STDC
DR 01F	SBMC
DR 1	STDC
DR 1S	STDC
DR 1F	SBMC
DR 2	MTDC
DR 3	MTDC
DR 4	MTDC/LTDC
DR 5	LTDC
HR3	MHCC
HCC3	MHCC
HCC4/HCC5/HCC6	LHCC
MR...	XHCC

General notes:

This price list is valid as of May 1st, 2020. Supersedes any previously issued price list(s). SOREL GmbH Mikroelektronik (SOREL) reserves the right to change specifications and pricing without notice. Any errors or omissions within this document are unintentional and may be subject to revision at any time by SOREL. The illustrations should be viewed only as schematic diagrams showing the respective hydraulic systems, and do not claim to be complete. The controller does not replace safety devices under any circumstances. Je nach Anwendungsfall sind weitere Anlagen- und Sicherheitskomponenten wie Sperrventile, Rückschlagklappen, Sicherheitstemperaturbegrenzer, Verbrühungsschutz usw. vorgeschrieben und somit vorzusehen. Die genannten Preise verstehen sich pro Stück ab Werk (EXW lt. Incoterms) Wetter (Ruhr) zzgl. Mehrwertsteuer. Standard customer discounts apply to orders over 50 €. Freight costs are charged depending on the required workload. Discounts are granted upon written request. Versions may differ from the illustrations. Subject to change without notice. The current terms and conditions of SOREL GmbH Mikroelektronik as can be seen on www.sorel.de shall apply. Actual products may differ from images. All rights reserved.
